

It's all about balance.

Why is Nikken the world leader in wellness technology?

Because we are a company based on a unique idea. A better quality of life, based on achieving balance in the Five Pillars of Health™ — Healthy Body, Mind, Family, Society and Finances.

Independent Nikken Consultants help people everywhere achieve their dreams through Nikken products and the Nikken business opportunity.

Find out more about Nikken, and see what a life in balance will do for you.

NIKKEN — THE WELLNESS HOME COMPANY

Nikken introduced the concept of wellness technology in 1975. Today the company operates internationally and has posted billions of dollars in revenue.

Founder Isamu Masuda had a vision of caring that would spread across the world. His desire to help others was translated into products and a philosophy for successfully meeting the challenges of modern living.

A REVOLUTIONARY CONCEPT — TOTAL WELLNESS

Total wellness is a different way of looking at health in general.

Traditional Western medicine has concentrated on curing disease. Wellness focuses instead on prevention, on avoiding illness rather than curing it.

We are a company based on a unique idea. Other companies sell a product or service — Nikken offers a better quality of life.

THE NIKKEN WELLNESS HOME

Nikken developed the Wellness Home, an idea based on the fact that we can live better by creating surroundings that support long-term health.

A Wellness Home offers solutions that address concerns in specific categories: Performance & Rejuvenation (the need for adequate rest and pain relief), Environment (clean air and water) and Lifestyle (nutrition and fitness).

These keys to wellness are not only individually significant, they are mutually dependent. When these multiple areas are in harmony, the result can be a dramatic improvement in our quality of life.

Our goal is to make every home a Wellness Home.

NIKKEN PRODUCTS — BASIC IDEAS, ADVANCED DESIGN

Our products combine ancient principles with modern technology. The company maintains close ties with numerous leaders in scientific specialties. Through these efforts Nikken is able to present a number of innovative technologies in products that are far ahead of anything else on the market today.

THE NIKKEN OPPORTUNITY
